SUMMARY

Backend Developer with hands-on experience building **scalable B2B SaaS platforms** and **data-driven applications** using **Node.js, Express.js, MongoDB, and Next.js**. Skilled in **RESTful API design, JWT authentication, TypeScript**, and **cloud deployment on Vercel**, with a background in **data engineering** and **Python-based analytics pipelines**.

EDUCATION

Dr A.P.J. Abdul Kalam Technical University (BBDITM)

B.Tech - Information Technology

2020 – 2024

Uttar Pradesh

EXPERIENCE

Backend Developer Intern

Jan 2025 – Present

Beno Support Technologies Pvt. Ltd.

Remote

- Building a **B2B sales intelligence platform (PDR)** using **Next.js 15, Node.js, Express.js, and MongoDB Atlas** with **JWT-based auth** and deployed on **Vercel**.
- Designed an **ICP (Ideal Customer Profile) matching engine** — a cascading filter pipeline across industry taxonomy, regions, tech stack, and buyer personas feeding into a **weighted scoring engine** that ranks prospects against company-defined benchmarks.
- Rebuilt the **Excel/CSV import pipeline** to handle **100k+ row datasets** at scale — replacing row-rejection with **field-level validation**, flagging invalid values and surfacing missing-field diagnostics for review.
- Resolved critical **lead-scoring pipeline issues** including schema mismatches and enum inconsistencies; centralized all scoring logic into a single **auditable, step-by-step traceable system**.
- Implemented **multi-field deduplication** (email, phone, name + account) and improved an **AI-powered enrichment pipeline** detecting tech stack signals and buyer intent to maintain prospect data quality at scale.

Data Engineer Intern

July 2024 – Jan 2025

EasyRewardz Software Services Pvt. Ltd.

On-site

- Developed **end-to-end data cleaning and analysis modules** using **Python and SQL**, handling preprocessing tasks including managing missing data, removing duplicates, and ensuring data quality.
- Automated repetitive data tasks to reduce manual effort; generated **automated reports** to present insights to stakeholders using real client datasets.

PROJECTS

PDR – B2B Sales Intelligence Platform |

Jan 2025 – Present

Tech Stack: Next.js 15, Node.js, Express.js, MongoDB Atlas, TypeScript, JWT, Tailwind CSS, Vercel

- Full-stack B2B prospect research tool with **role-based access control, campaign management, segment/ICP engine**, and **audit logging** — built for sales teams to score and manage leads at scale.
- Designed and integrated **RESTful APIs** across **14+ modules** including accounts, contacts, campaigns, notifications, duplicates, and user management with a centralized **JWT auth middleware**.
- Resolved **Vercel serverless deployment** compatibility issues including **multer** disk storage errors, **fs** module conflicts, and **app.listen()** incompatibilities for a production-ready cloud build.

Data Cleaning and Analysis Project | Python, SQL, Pandas

2024

- Built a **data cleaning and analysis pipeline** using **Python and SQL**, automating preprocessing tasks including handling missing values, removing duplicates, and performing statistical analysis.
- Created scripts for **data visualizations** and **automated reporting** to summarize findings and present insights clearly to stakeholders using real client datasets.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML/CSS

Technologies/Frameworks: Next.js, Node.js, Express.js, MongoDB, MySQL, REST APIs, Tailwind CSS

Developer Tools: Git/GitHub, VS Code, Postman, MongoDB Compass, PyCharm, Eclipse, RDBMS

Cloud & DevOps: Vercel, AWS (Basic)

Key Courses: Data Structures, Database Management Systems, OOPs, Algorithm Analysis

CERTIFICATIONS

Java Full Stack – JSpiders, Noida

Web Development Bootcamp
